Assets, $40,037,989.76. Liabilities, 4 per cent Standard, $34,404,197.24.
Surplus to Policy Holders, $5,633,792.52.

Over $116 of assets to every $100 of liabilities. For the whole period of its existence, the death rate has been only .61 of the rate indicated by the Mortality Experience Tables, thus giving it the lowest death rate of any company in the United States.

Evidence of the skillful and careful management of this company is found in the exceedingly low expense rate. The organization of the company affords a strong guarantee of safe management for the future. The question of first importance is that of absolute security.

SPRINGFIELD STREET DIRECTORY.

The Street Directory gives the location of each street, and shows what other streets, avenues or places run from or across it, with the number at which they intersect.

From this list the location of any number on a street can be easily ascertained. As, for instance, wishing to know at what part of Main street No. 310 comes, turn to Main street, and you find that Worthington street intersects at 298, right side, and Bridge street at No. 340, showing that No. 310 comes on the right side of Main street between Worthington and Bridge.

FIRE ALARM TELEGRAPH.

Instructions to Key Holders.—Key holders, upon positive information of a fire, will unlock the box, and, if the bell or the small bell in the box is not striking, pull the hook down to the end of the slide once and let go immediately. Do not strike an alarm when the bells or the small bell in the box is striking, for in that case the alarm is already striking, and to give a second one would confuse the firemen. After giving an alarm, remain, if possible, until the steamers arrive, to direct them to the fire. If you hear no clicking sound in the box after pulling the hook, go to the next box, and give the alarm from that.

Do not give an alarm for a fire at a distance, *nor for a burning chimney*. Do not strike the alarm more than once from the same box. Be sure the box is locked before you leave it.

No body has been deposited in these grounds since the beginning of the present century.

THE IMPROVED

Chadwick Copying Book

TRADE-MARK.

PATENTED
OCTOBER 16, 1888.

These Books are made waterproof at binding and corners, and are provided with moistening pad and oil sheets, by the use of which a number of pages can be kept moist and ready for immediate use, DISPENSING ENTIRELY WITH WATER POT, BRUSH AND WET BLOTTERS. The pad is first wet with water, then placed in book, back of twenty or more sheets, and put in press until required for copying, when sheets will be found uniformly and thoroughly moist and VERY SUSCEPTIBLE TO ANY COPYING INK.

The back of the book being waterproof prevents the moisture from working into the binding or into leaves already copied on, and by similar treatment of corners leaves do not stick together and prevent rapid handling. The paper in these books is of extra strength, so they can be readily handled without tearing.

WE MAKE ANYTHING WANTED IN THE LINE OF LETTER OR INVOICE COPYING BOOKS.

AUTOMATIC SCUTTLE AND SKYLIGHT OPENER.

In placing this Opener before the Public, we wish to call attention to some of its merits:

1—It can be easily opened from floor below and will remain open.

2—It is operated with one rope, which both opens and closes Scuttle or Skylight.

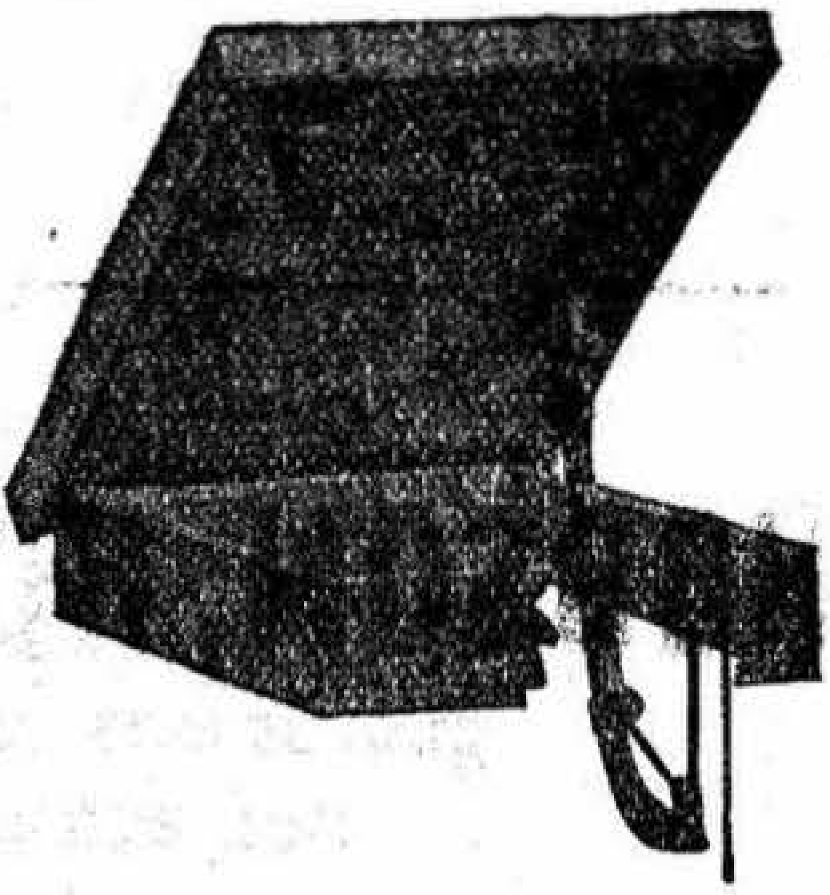
3—When closed it is **Self-locking,** having two bolts, making it impossible to open same from roof.

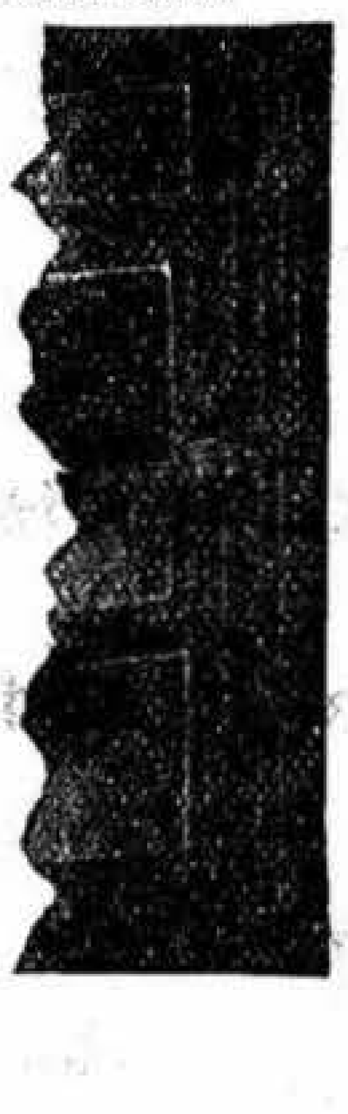
4—In case of **Fire** there is no climbing of ladder to unlock Scuttle. One pull of the rope opens bolts and Scuttle, which remains open, allowing people to escape by way of roof.

5—It can be partially opened (for ventilation), without the inconvenience of climbing up ladder to unfasten bolts.

6—It is made of wrought and malleable iron, and constructed so that it will not break or get out of order.

7—It is simple in construction, and can be put up at a small cost.





VENTILATING SASH LOCK.

Upper or Lower Sash or Both can be opened for Ventilation, and Lock will Fasten them to Window Frame so they cannot be Opened from Outside. To Lock Sash, Pull Lever; To Release, Push Button.
